$\mathcal{N}_v(x) < 0$
admissible algebraic factor: $\mathcal{N}_v(x) \geqslant 0$
orientation-preserving
inverse sheet
$\mathcal{N}_v(x) < 0$
$x_-(v) = -2v/(1-v^2)$: $A = 0$ (fold)
$x_+(v) = 2v/(1+v^2)$: ordinary density root
representative $\ell > 0$ path (r increasing)
representative $\ell < 0$ path (r increasing)
$x = r\ell$
subluminal speed v
